My 4XE is affected by the battery recall.

Good thing my 4XE is charged back by the alley. Sigh.... 🙄

dtorgue • 7mo ago

It was charging (on 220v). Not sure if it was done charging yet or not

I know this is late in asking this question but what brand 220v charger were you using?

What happened to your jeep after it caught fire? Did jeep cover the damage, replace battery? Was it on the recall list?

dtorgue • 4mo ago

Jeep is buying it back, after some negotiation. The poor thing was totaled. Torched interior, glass smashed from the fire co, plastics burned through by the rear passenger tire which blew the tire. Yes it was. I had a 2021 from built in June or so.

We are in the middle of purchasing a 2021 with a recall on it. Very low miles but great price. Hoping that we can just use gas until the recall is fixed? What are your thoughts? I am getting mixed messages from dealerships. This is a used 2021 from a non Jeep dealer. We noticed many dealers don't sell safety recall cars at all until fixed. So was your Jeep considered one of the eight that actually caught on fire. I'm sorry that happened to you. Hopefully they gave you a fair buy back price

Just bought a totally clean 2006 TJ Tub to replace the rotted out tub on my 2006 TJ. Drove all the way to South Carolina from Michigan for it. Super excited!

I'm not saying my Jeep was a good financial decision, but am I a financial guru for owning it? Obviously yes.
